Physical Specifications

Height 60.0"
Width 46"
Depth 22
Weight 170 lbs.

Electrical Specifications

Electrical requirements

100-120VAC ~ 50/60 Hz, 5.0A
200-240VAC ~ 50/60 Hz, 2.5A

Operating temperature

32 F – 115 F Degrees
0 C – 45 C Degrees

Operating Humidity

20% – 80% Relative Humidity

Ginko Systems "TouchTeller Software" HR Kiosk Solution

This is a total HR kiosk solution, which utilizes a network including dial up modem, phone line, receipt printer, smart card, camera, computer, and touch screen. The software would include a customer attractor and GUI script to guide the customer (English/Spanish), operating over an encrypted network tied to CSR's in your facility or other locations. This network would link customers at kiosks to available CSR's operating in a customer support center. Additional software would be created to allow the CSR to operate the camera, capture digitized documents, talk to the customer via phone.

Ginko would support the kiosk and application software, network operations management and firewalls (NOC), CSR/kiosk matching and switching, and the CSR. The CSR's would continue to be employees of your company, while all other staffing/monitoring including custodial and maintenance, software licensing, network management, applications, and kiosks would be provided by Ginko Systems

About Ginko Systems LLC

Ginko Systems provides end-to-end support to deliver our clients world-class programs. Our offerings include:

- Kiosk Design & Development
- Web Management and Network consulting
- Program Management and Consulting Services
- Scaleable Manufacturing using ISO 9000 Certified Partner
- Nationwide Services Organization
- Help Desk Services & Remote Monitoring

Ginko Systems is internationally recognized in design, development, manufacturing, and support groups specializing in interactive information and transaction devices (kiosks), web-enabled products, leading edge networked devices, and related e-commerce programs. We proudly serve the financial, retail, hospitality, transportation, government, telecommunications, entertainment, and general merchandising sectors.

We have an internationally recognized reputation for the design of self-service, interactive products. This reputation, combined with a proven history of manufacture of complex electro-mechanical devices, clearly distinguishes our company from our competitors. Our staff includes industry-recognized experts in the field of safety, product compliance and accessibility.

Ginko Systems is experienced in hardware and software integration of various operating systems, network applications, remote management and e-commerce applications (ATM, secure transactions, streaming video web-casting, data-mining, digital video & music delivery, photo processing, etc.).
